

Case Study Libertas Care

www.libertas-care.co.uk

Libertas Care needed burgundy tunics with daffodil yellow trim. This had been the colour of their uniform for many years but they were no longer able to source them.

They asked us to manufacture the tunics for them.

We sent Libertas swatches of fabric in both burgundy and yellow and their MD Paul Clarke was able to select an excellent colour match.

Following this we manufactured pre-production sample garments for Paul to approve. We made one garment with pleats at the back, and one without. Paul was able to choose and select the best tunic for his staff.

Once this decision had been made we then went to full production and finished off the tunic by embroidering the Libertas Care logo onto the tunics.

This is the result - a happy customer! Suzanne, Care Manager Libertas Care.

"Thank you for your email, we received the delivery this morning and are delighted with the quality.

Thank you for your attention to detail and for the good manufacturing and delivery time.

May our association continue well into the future".

Kind regards

Paul Clarke BSc (Hons) EUCP, SRPara
